

# **#GREENvsBLUE** NATURAL INGREDIENT **TO PROTECT SKIN** FROM BLUE LIGHT DAMAGE

## ARE YOU SURE TO KNOW EVERYTHING ABOUT PREMATURE AGING?

Consumers are getting increasingly aware about sun damage on the skin, but they are still little aware about premature aging from long-term exposure to electronic devices such as TVs, smartphones, PCs or tablets which are source of high energy visible blue light (HEV-BL).

OLEA-HT 10<sup>™</sup> is a standardized powdered extract, titrated in hydroxytyrosol and tyrosol, two strong antioxidant molecules (10-12% w/w HPLC). Following the BIONAP's philosophy, it is obtained from a by-products of the sicilian olive oil production. OLEA- HT™10 is certified ECOCERT and COSMOS.

INCI NAME: Olea Europaea (Olive) fruit extract, Maltodextrin **COUNTRY OF ORIGIN:** Sicily - Italy PARTICULAR SIGN: Natural Origin Index (ISO 16128):1

Sustainable ingredient from by-product

#### **RECOMMENDED USAGE CONCENTRATIONS** 0.5-1%

### **RESULTS OF IN VITRO TEST AND COSMETIC BENEFITS**

**PROTECTS AGAINST BLUE LIGHT-INDUCED** CELL PROLIFERATION DAMAGE

ROS **ROS PRODUCTION** 

**REDUCES SIGNIFICANTLY BLUE LIGHT-INDUCED** 

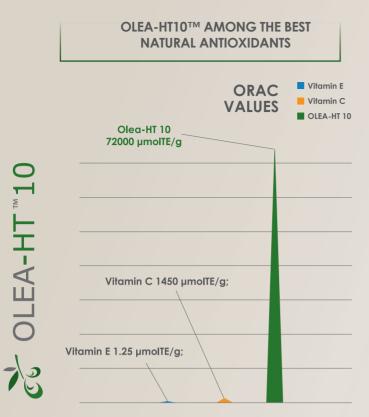

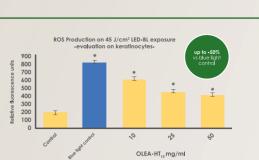

PROTECTS DNA FROM BLUE LIGHT-INDUCED DAMAGE

**PROMOTES COLLAGEN RESTORATION** ംട്ട്ര് AND DECREASES THE PRODUCTION OF MMP-1 AND MMP-12

**IN VITRO TEST** 

Results showed that the pre-treatment with OLEA-HT™10 reduces the generation of ROS by 25-50% in human epidermal keratinocytes and by 58-68% in human dermal fibroblasts - comparison to the blue light control. \*p < 0.05

Results showed that the pre-treatment with OLEA-HT™10 of fibroblasts, exposed to LED-BL, not only protects collagen from degradation but also stimulates its ex novo synthesis. N.D. not determinate. \*p <0.05
