

BIONAP

BIOACTIVE NATURAL PRODUCTS

HARVESTING THE FORCE OF NATURE

First quality botanical extracts from the Mediterranean millenary culture.

NUTRACEUTICAL

The Mediterranean region offers a wide range of unique and very rich plants. Every day, Bionap's researchers develop natural ingredients, striving for better health and wellness for people around the world.
Every Bionap product has a Circular Economy Commitment.

We have identified co-products from the agricultural industry as the driver for a sustainable innovation system. Thanks to Bionap's scientific research, raw materials such as prickly pear cladodes, olive leaves and small oran ges, which have no use in the agro-alimentary industry, find a new life. We turn what once was considered to be of no use in the agricultural market into certified ingredients for various nutraceutical solutions.

BIONAP
BIOACTIVE NATURAL PRODUCTS

	Botanical origin	Dosage	Chemical composition	Health benefits
